- Involved in native Android mobile application development using Java.
- Supported web application development using React.js and Vue.js.
- Performed database management and optimization using MySQL and PostgreSQL.
- Assisted in deployment and application maintenance in production environments.

Supervisor IT Development (Backend)	Juni 2020 - Desember 2023
--	---------------------------

Brighton Real Estate

- Responsible for backend system development and maintenance.
- Conducted system optimization and code refactoring to improve application performance.
- Provided technical support for backend-related issues.
- Participated in implementation of AI-based features within applications.

Education & Certification

Institut Teknologi Adhi Tama Surabaya	2016 - 2023
--	-------------

Bachelor's Degree in Information Technology — GPA: 3.51 / 4.00

Final Project: Developed a native Android mobile application using Java and Kotlin integrated with backend services.

- **Certification:** Junior Programming Certification

Project Experience

SHE SIG - SISI

Developing apps for Keselamatan, Kesehatan Kerja, dan Lingkungan (K3). Enhancement Dashboard Monitoring SHE SIG.

Responsibilities: API development, deployment and maintenance.

Tech Stack & Tools: Laravel, Vue.js, PostgreSQL, Git, Docker, Linux Server, forticlient vpn

Indonesia Cement Research Institute (ICRI) - SISI

Improve security and fixing file problem.

Responsibilities: API development, deployment and maintenance, bug fixing, code refactoring, system optimization.

Tech Stack & Tools: Laravel, Node.js, PostgreSQL, Redis, Kafka, MinIO, Git, Docker, Linux Server, forticlient vpn

Project Simphoni - SISI

Combine 2 apps hukum online with simple (document management).

Responsibilities: API development, deployment and maintenance.

Tech Stack & Tools: CodeIgniter 3, React.js, PostgreSQL, Git, Docker, Linux Server, forticlient vpn, ghostscript

Revamp System (Project Edems - SISI)

Revamp application from codeigniter 3 (PHP 5.4) to codeigniter 4 (PHP 8.4) and update security.

Responsibilities: API development, database optimization, deployment and maintenance.

Tech Stack & Tools: CodeIgniter 4, PostgreSQL, SAP, Git, Docker, Linux Server, forticlient vpn

Mobile & Web Integration System (Project MSO - SISI)

Develop backend services to support Android (Java) and web apps (php).

Responsibilities: API design, data synchronization, performance optimization.

Tech Stack & Tools: Android native java, CodeIgniter 3 (PHP 5.4), Git, Docker, Linux Server, forticlient vpn

Backend System Development (Brighton)

Develop and maintain internal backend systems.

Responsibilities: feature development, bug fixing, code refactoring, system optimization.

Tech Stack & Tools: Silverstripe (PHP 5.6 & PHP 7.2), Node.js, MongoDB, MySQL
